Understanding and Addressing Challenging Behaviors of Individuals with Complex Needs

Webinar Series: Part Five

Chris Filler,
Transition Coordinator

Wendy Szakacs,
Regional Coach ASD/LI

A division of the ESC of Central Ohio

SINCE LAST WEBINAR: YOU COMPLETED STRENGTHS FOR YOUR INDIVIDUAL

Begin with Success:
~ Recognize the Strengths

SINCE LAST WEBINAR: YOU COMPLETED SECTIONS 3 & 4

SINCE LAST WEBINAR: YOU COMPLETED DATA FOR YOUR INDIVIDUAL

Data and Your Individual

Behavior

| | |
|------------------------------------------------------------|--|
| What are you going to measure? | |
| What would be the best way to measure? | |
| Who is going to create the data sheet? | |
| Who will be responsible to track the data? Graph the data? | |
| When will the team meet to review data? | |

SINCE LAST WEBINAR: YOU COMPLETED REINFORCEMENT FOR YOUR INDIVIDUAL

Reinforcement and Your Individual

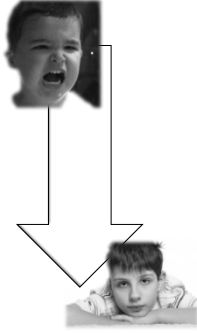

| | |
|----------------------------------------------------------------------------------------------------------|--|
| Discuss what is reinforcing to your individual. If you aren't sure, how can you find out? | |
| What types of reinforcement would work best with your individual? | |
| What schedule of reinforcement would best support teaching the new skills that will change the behavior? | |

Interventions to Address Targeted Behaviors: Creating Your Toolkit

Intervention Objectives:

Some interventions decrease the stress that increases intensity or frequency of behaviors

Intervention Objectives:

More Sleep

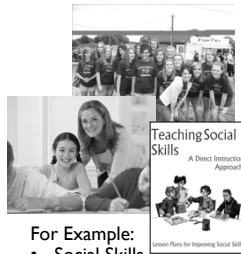

Some may change the setting events that make the behavior more likely to occur

Predictability and Routine

Intervention Objectives:

Some of the interventions may directly teach or reinforce the needed skills ...both substitute skills and related skills

For Example:

- Social Skills
- Coping Skills
- Academic skills

What is a “Substitute”

When asking a person to change or “give up” a challenging behavior, the person should be provided or taught a substitute or replacement behavior

The new behavior should provide the individual with the same outcome or get the same results as the challenging behavior (as determined by the FBA)

What is a “Related Skill”?

There are many skills (...in addition to the substitute skill....) that would be helpful for a person and would improve opportunities and outcomes.

But these skills or behaviors **do not** have exactly the same outcomes as the behavior being replaced (that's why they are “related” and not “substitute”).

These can be taught, but are secondary to the replacement skill.

Let's look at it in a different way.....

You have a Droid smartphone ...and you lose it!!!

Equivalent Replacement

The iPhone

Related Replacements

Only a Phone

Functionally Equivalent

Functionally Related

Replacement Behaviors: *Must be "Equal"*

Equivalent/Same

If Hitting = Escape from Academic Demands

An Equal and Substitute skill/behavior could be teaching:
to "ask for a **"break"**
to be **"done"**
to **"leave"**

Related/Connected

If Hitting = Escape from Academic Demands

Related Skills could be teaching:
• to ask for **help**
• to **request a different math paper**
• the **desired academic skills**

.....but these are not equal

4 Common Areas for Replacement Skills

Escape
Attention getting
Communication
Coping

Evidence Based and Promising Practice

"The best measure of effectiveness of an intervention is **whether it is effective for a particular individual**. It is of utmost importance to **collect and analyze data** when using interventions with a student with autism. If an intervention **results in positive change** for a particular student and you, as an educational professional, **have data to support** that, **then the intervention is evidence-based for that student.**"

WHY Does A Strategy Work?

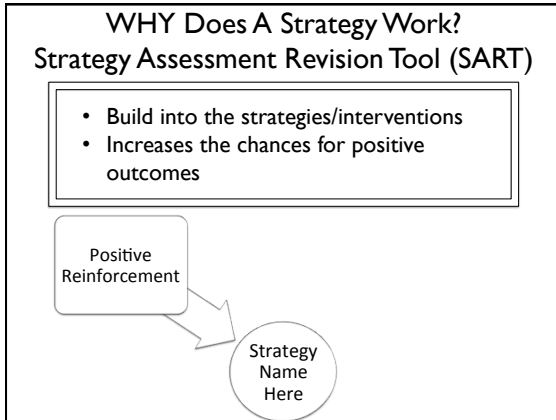

Strategy Assessment Revision Tool (SART)

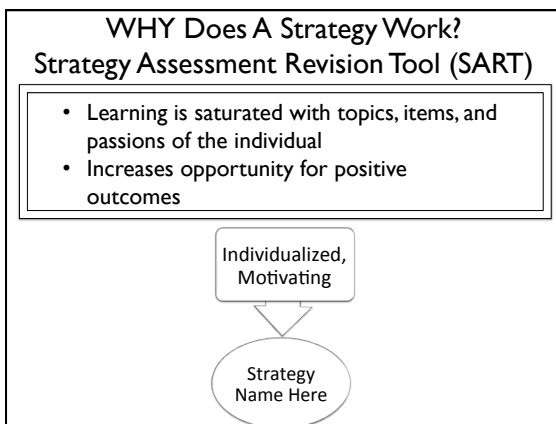

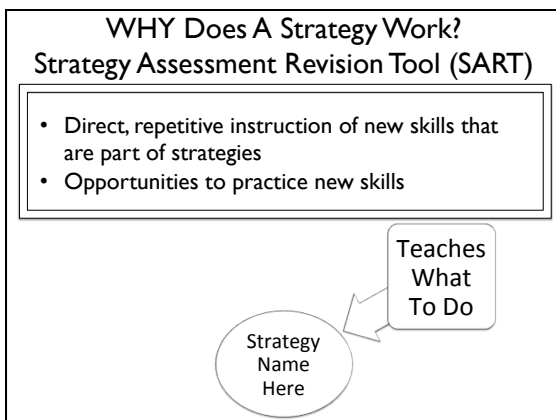

WHY Does A Strategy Work?
Strategy Assessment Revision Tool (SART)

- New information is best learned through repetition and uniformity of instruction
- Strategy/intervention needs to be same across environments and people

WHY Does A Strategy Work?
Strategy Assessment Revision Tool (SART)

- Making sure all steps of a strategy are being taught in the way it was developed and studied
- Requires ongoing data collection and analysis

WHY Does A Strategy Work?
Strategy Assessment Revision Tool (SART)

Incredible 5-Point Scale

- Controls emotional reactions
- Student participates
- Identifies problem
- Enhances alternative, positive behaviors

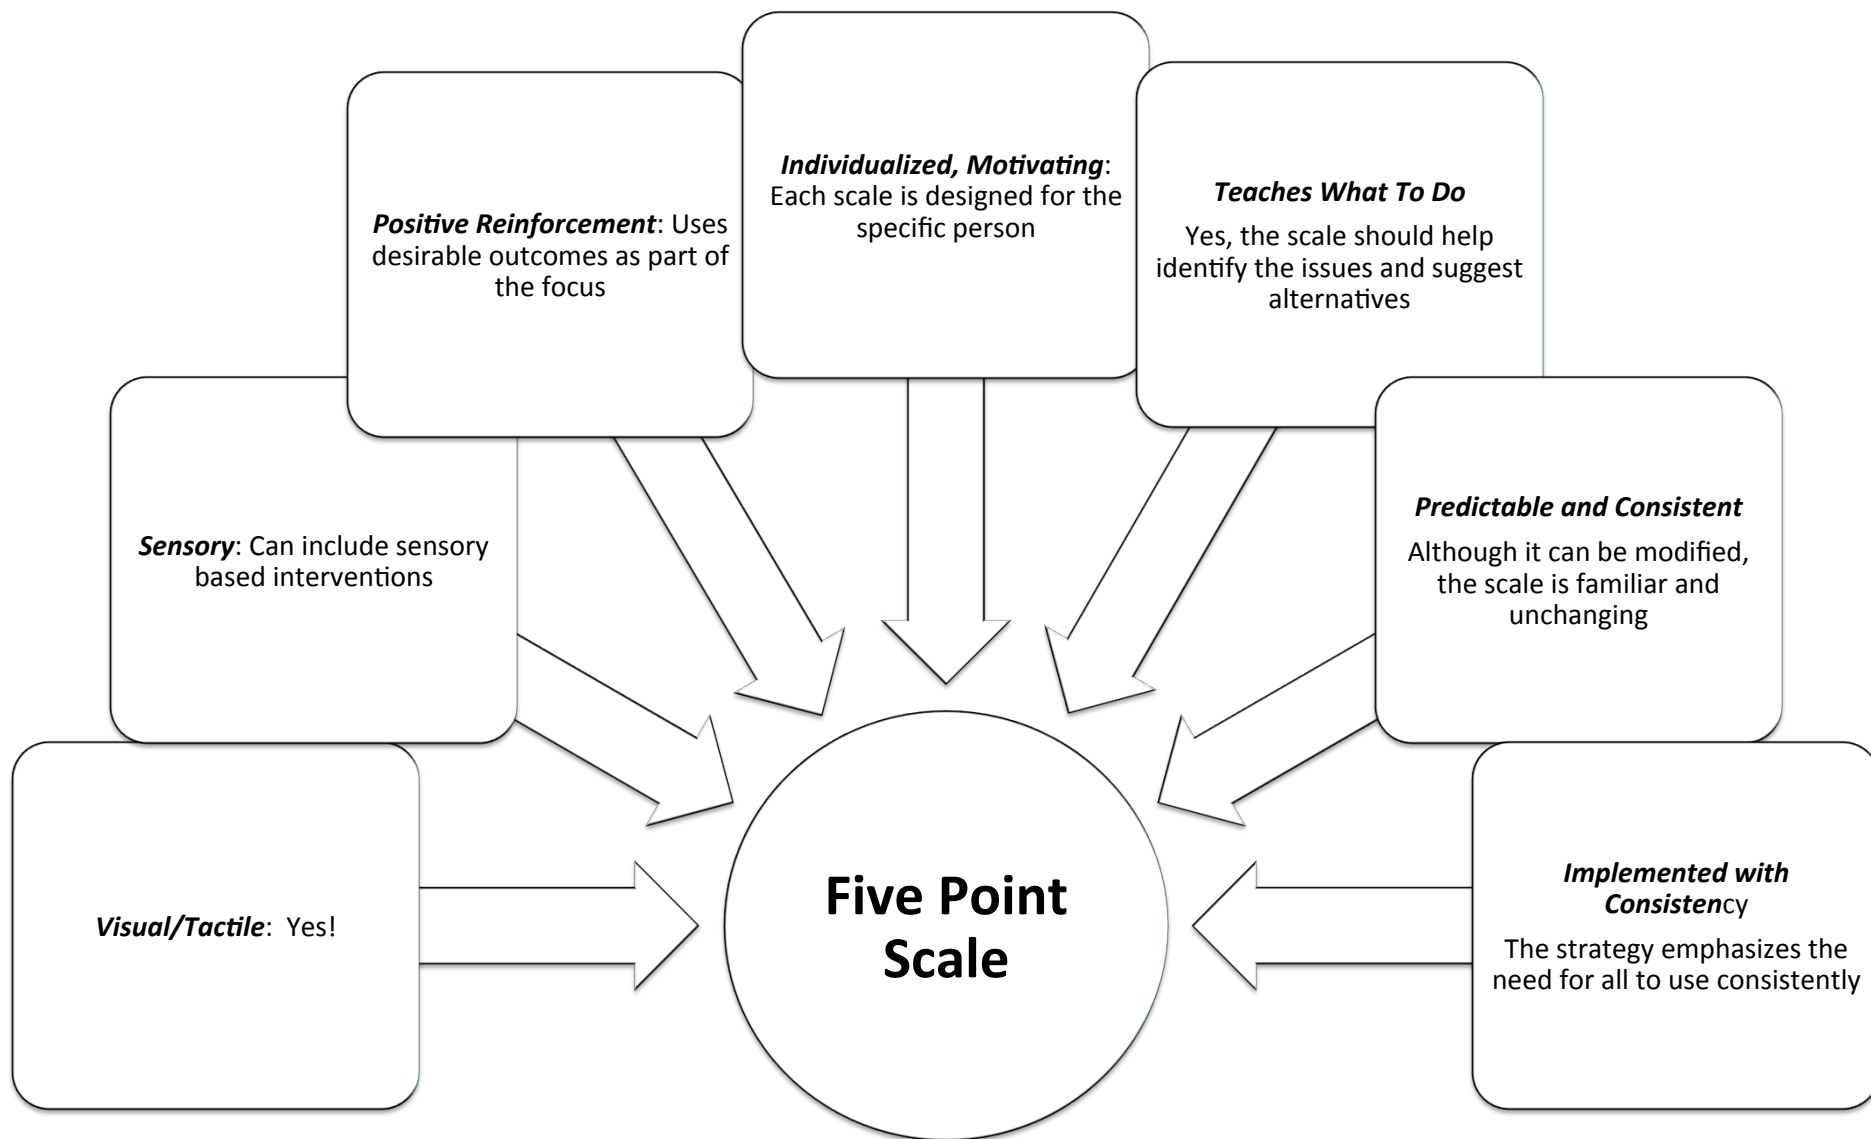

| Rating | Description | Setting |
|--------|--------------------|---------------------------------------|
| 5 | Screaming | Emergency only |
| 4 | Outside voice | Recess, ball game |
| 3 | Talking voice | Classroom, lunchroom |
| 2 | Soft voice/whisper | Library |
| 1 | No talking | When someone is talking to me, movies |

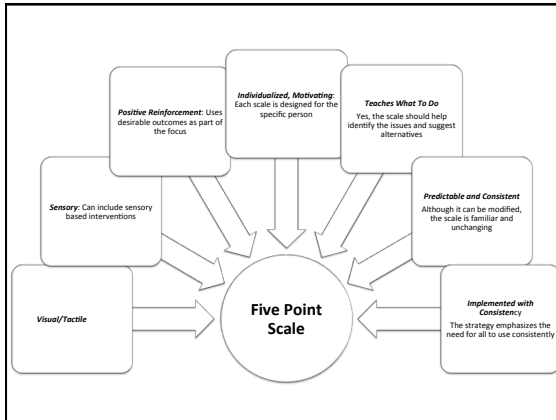

Example of an Incredible 5 Point Scale

| Rating | Looks/Sounds like | Feels like | I can try to |
|--------|------------------------------|----------------------|-----------------------------------------|
| 5 | Hitting, kicking | Volcano | Ask to call/go home |
| 4 | Swearing | I am about to erupt | Use words I learned from Mrs. B |
| 3 | I can't sit & my face is red | Fidgety | Take 3 deep breaths and ask for a break |
| 2 | I'm sitting and attending | Other kids, maybe | Stay in the groove |
| 1 | I am ready for anything | Sitting on the beach | Enjoy |

| | | |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Feeling Out of control – This could end up with me being fired if I fall apart! I need to use my "HELP" card to ask for help so I can have a quiet break | <p>Individuals can use the concept of the 5 Point Scale to develop a visual reminder of how they may feel and what they need to do.</p> <p>This scale is an example of what may be developed after a person has worked through and recognizes how it feels to "escalate and escape" and what action may be necessary when that occurs to avoid unfortunate endings</p> |
| 4 | Almost over the edge – I can feel it coming and know I need to get out. Grab the stress ball and walk outside | |
| 3 | It's Building – I feel unsettled, hard to concentrate. Ask the boss for a break | |
| 2 | Something is not quite right – I know something is happening. Self-Talk ("Relax"), Listen to music while I work | |
| 1 | Chillin' – I am good. I can do the work and I feel safe. | |

Social Narratives

- Stories that describe social situations and appropriate behaviors or responses
- May be all words or have pictures
- Written at the individual's level of understanding
- Helps the individual learn a new social behavior
- Needs to be taught to the individual

Example of a Social Narrative

"Pretending"

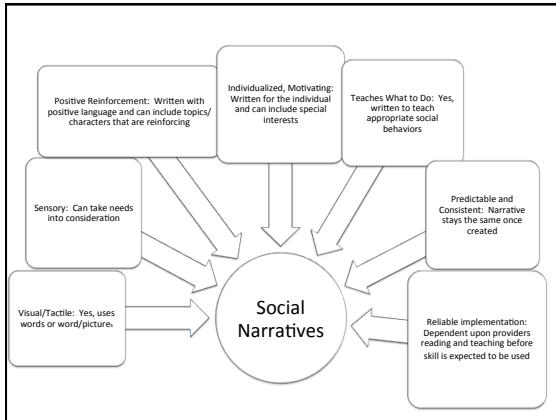

Sometimes when I play with my friends, we may pretend to be someone else. Pretending means to act like someone else for a short time and then be myself again.

Sometimes, we might pretend to work at a grocery store. We might use pretend food and money in a play cash register. We pretend to be workers and shoppers.

Sometimes, we might play dress-up and pretend to be a doctor or nurse. Someone pretends to be a patient and someone pretends to make them better. When we pretend, we never use real medicine or other things that might hurt us.

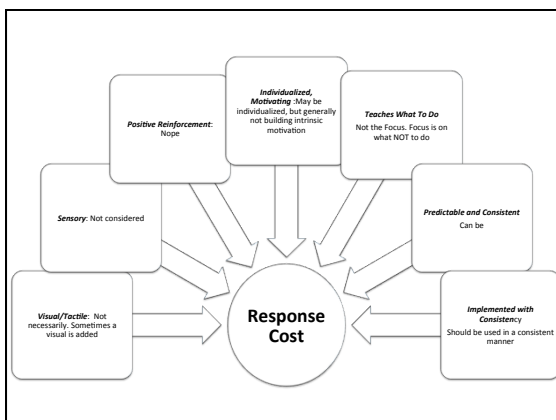

When we finish pretending, my friends and I are ourselves again. We are like actors and actresses who perform a play and then, it is over. Pretending can be fun.

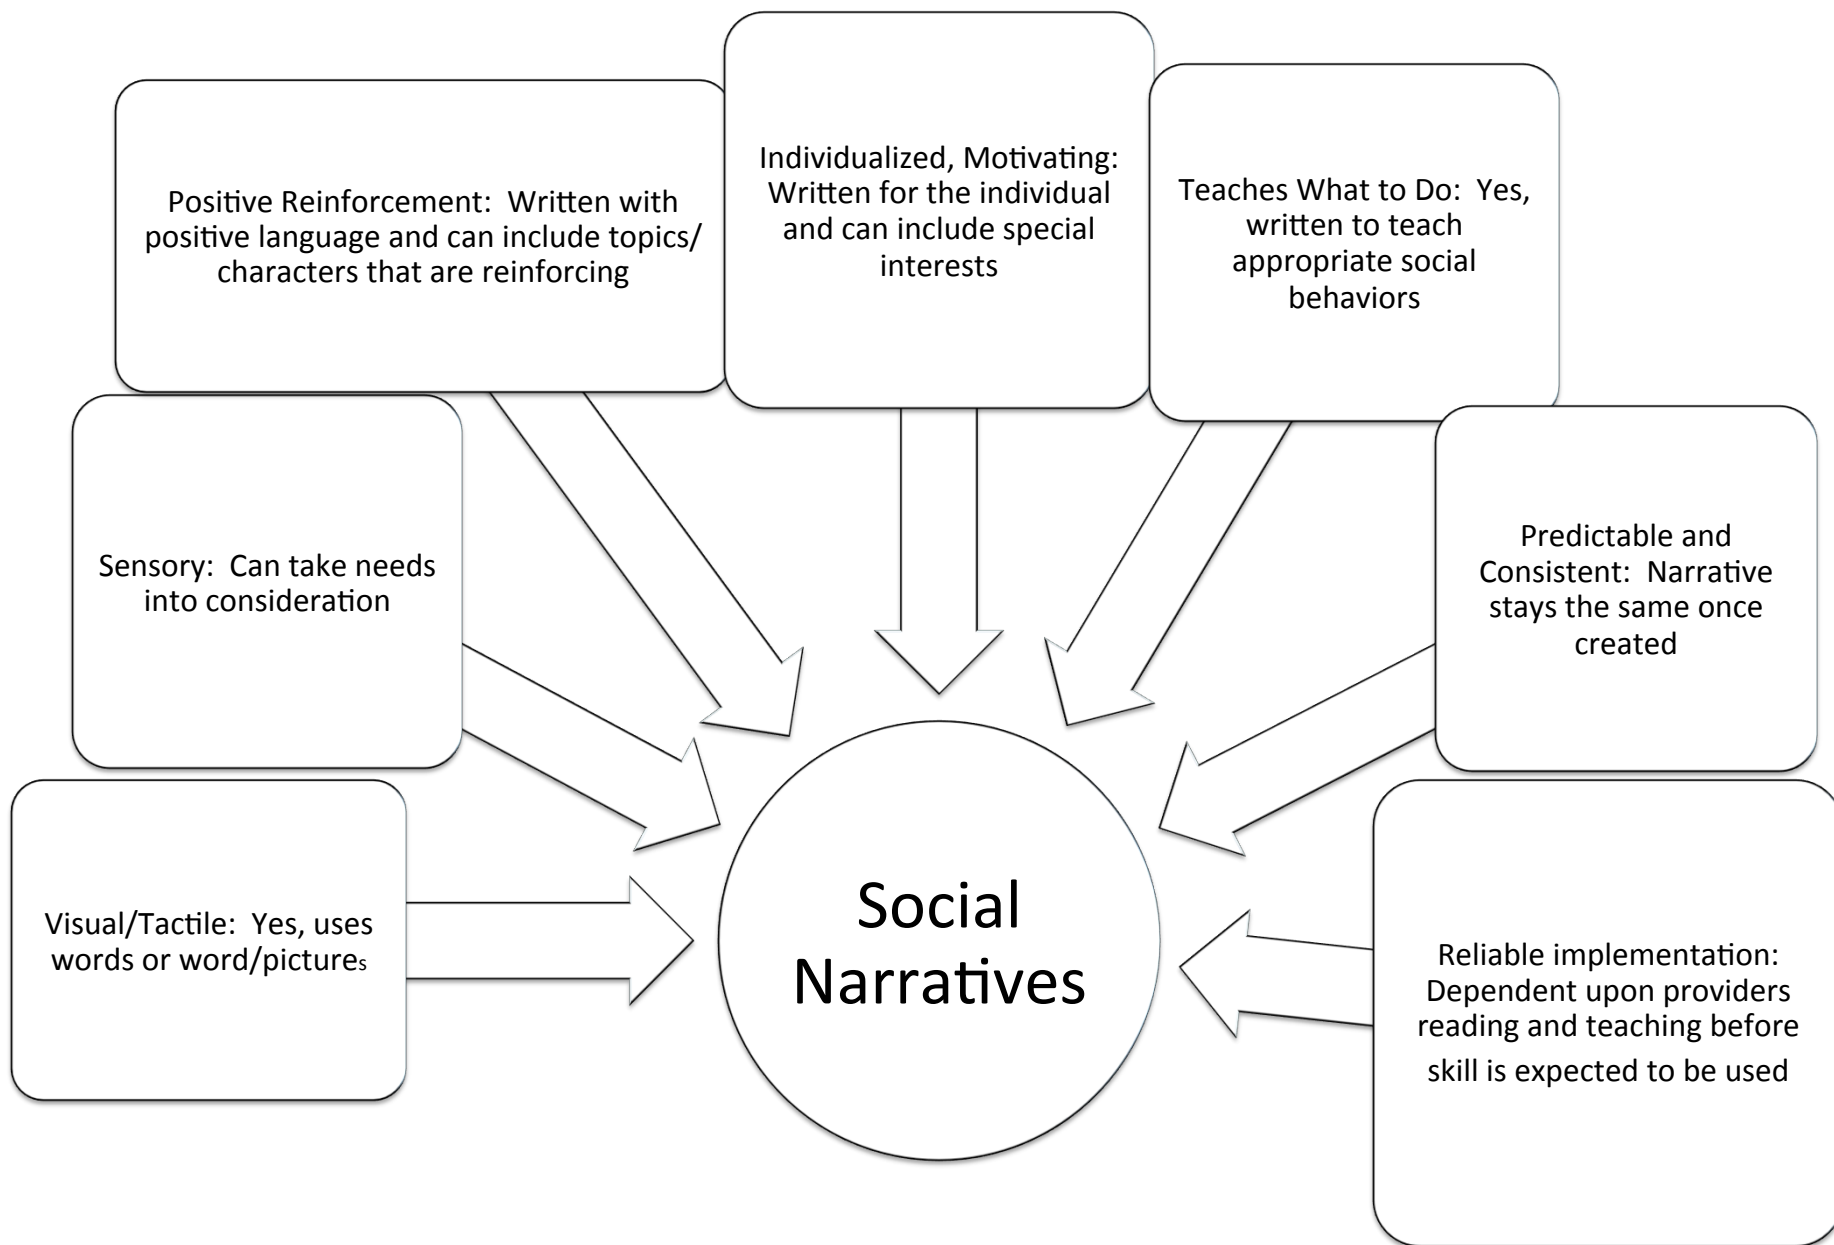

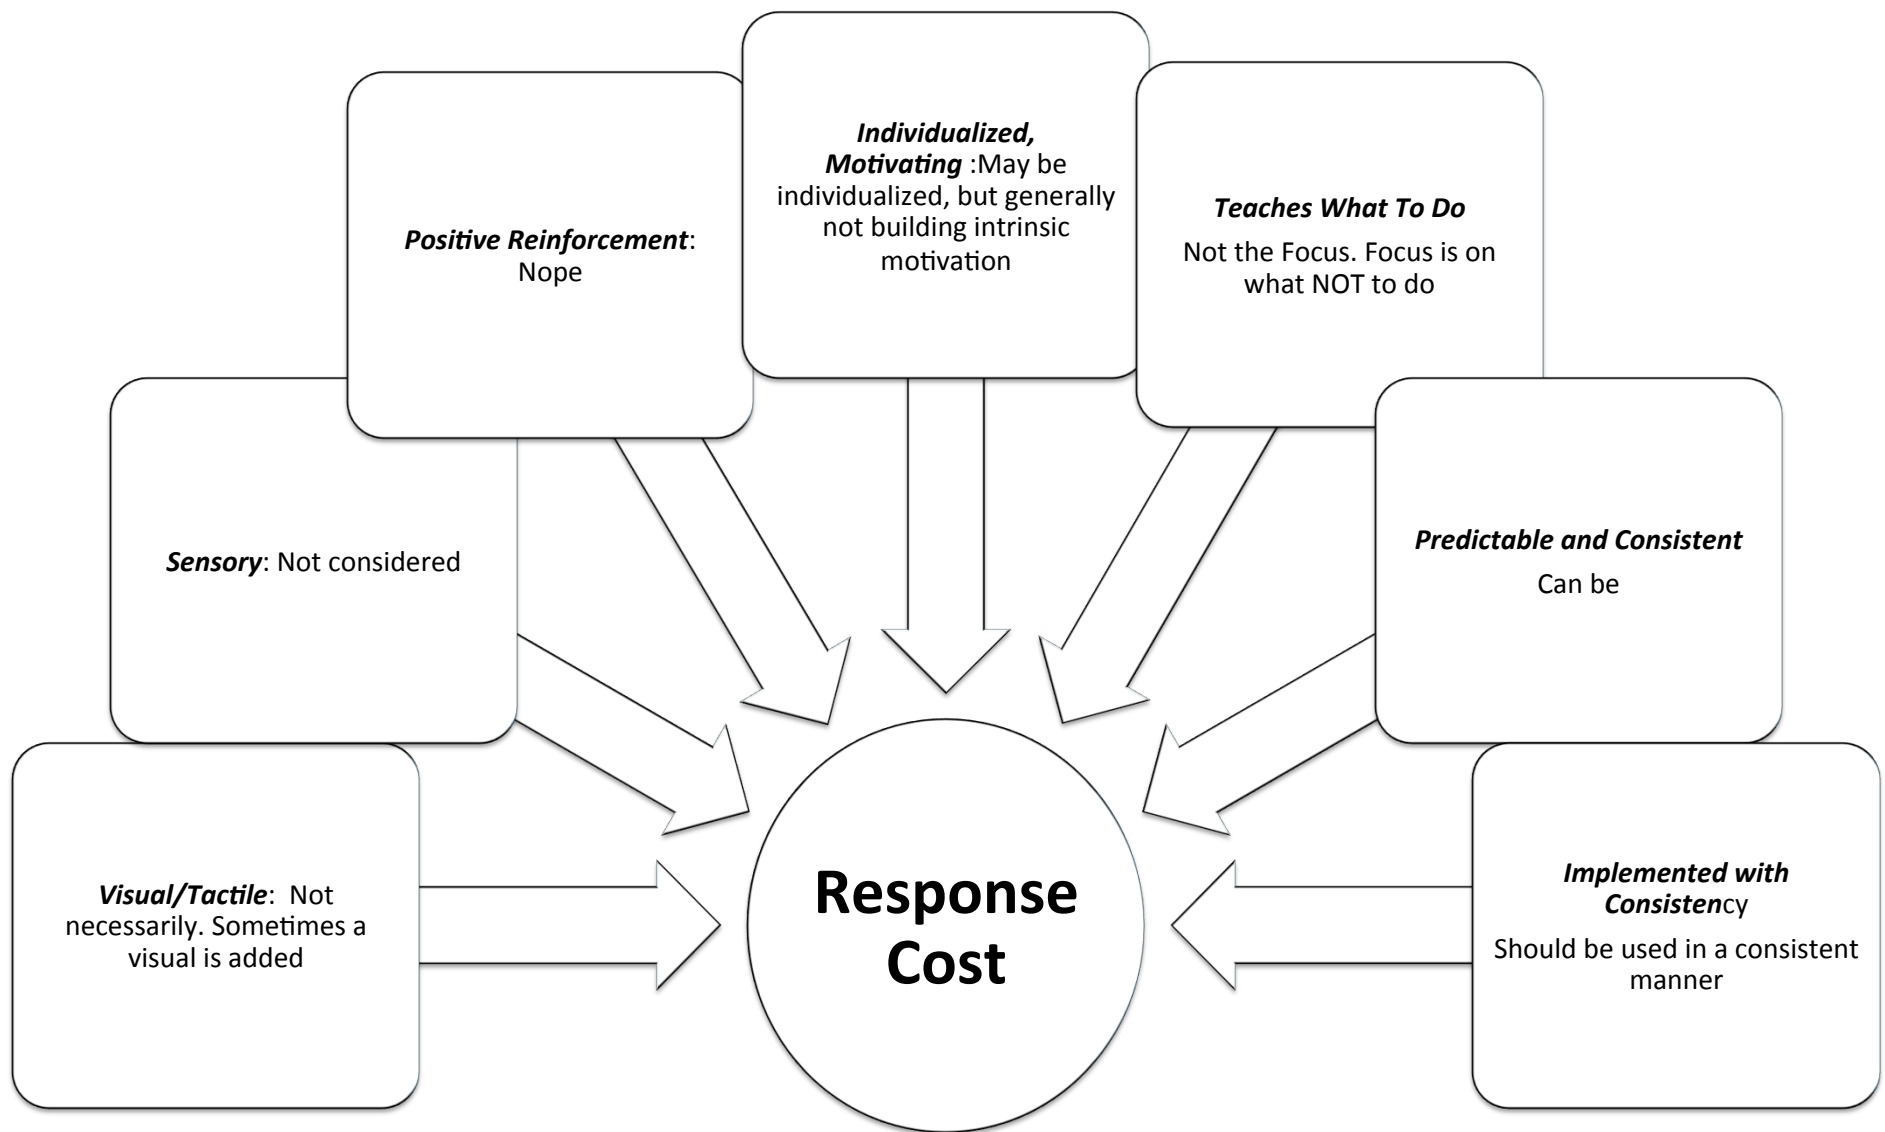

Response Cost

- A penalty is assessed for inappropriate behavior
- Could include a stepwise or staircase system of losing more for each incidence of inappropriate behavior
- Loss of: points, tokens, recess, computer time, etc.

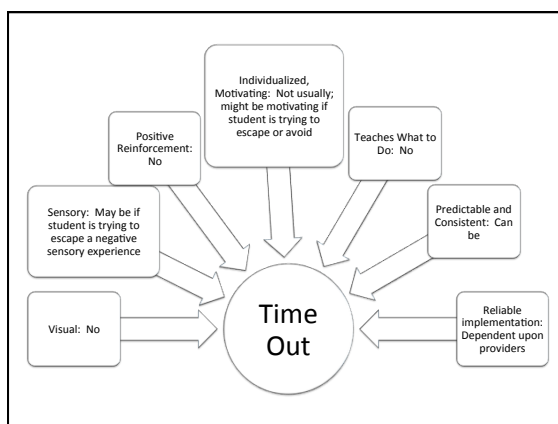

Exclusionary Time Out

- Removal from a situation in which the individual is exhibiting inappropriate behavior (e.g. hurting self, endangering physical well-being of others, damage to property)
- Allowing for time to regain self-control
- Moved to a separate area away from peers, family members, activities

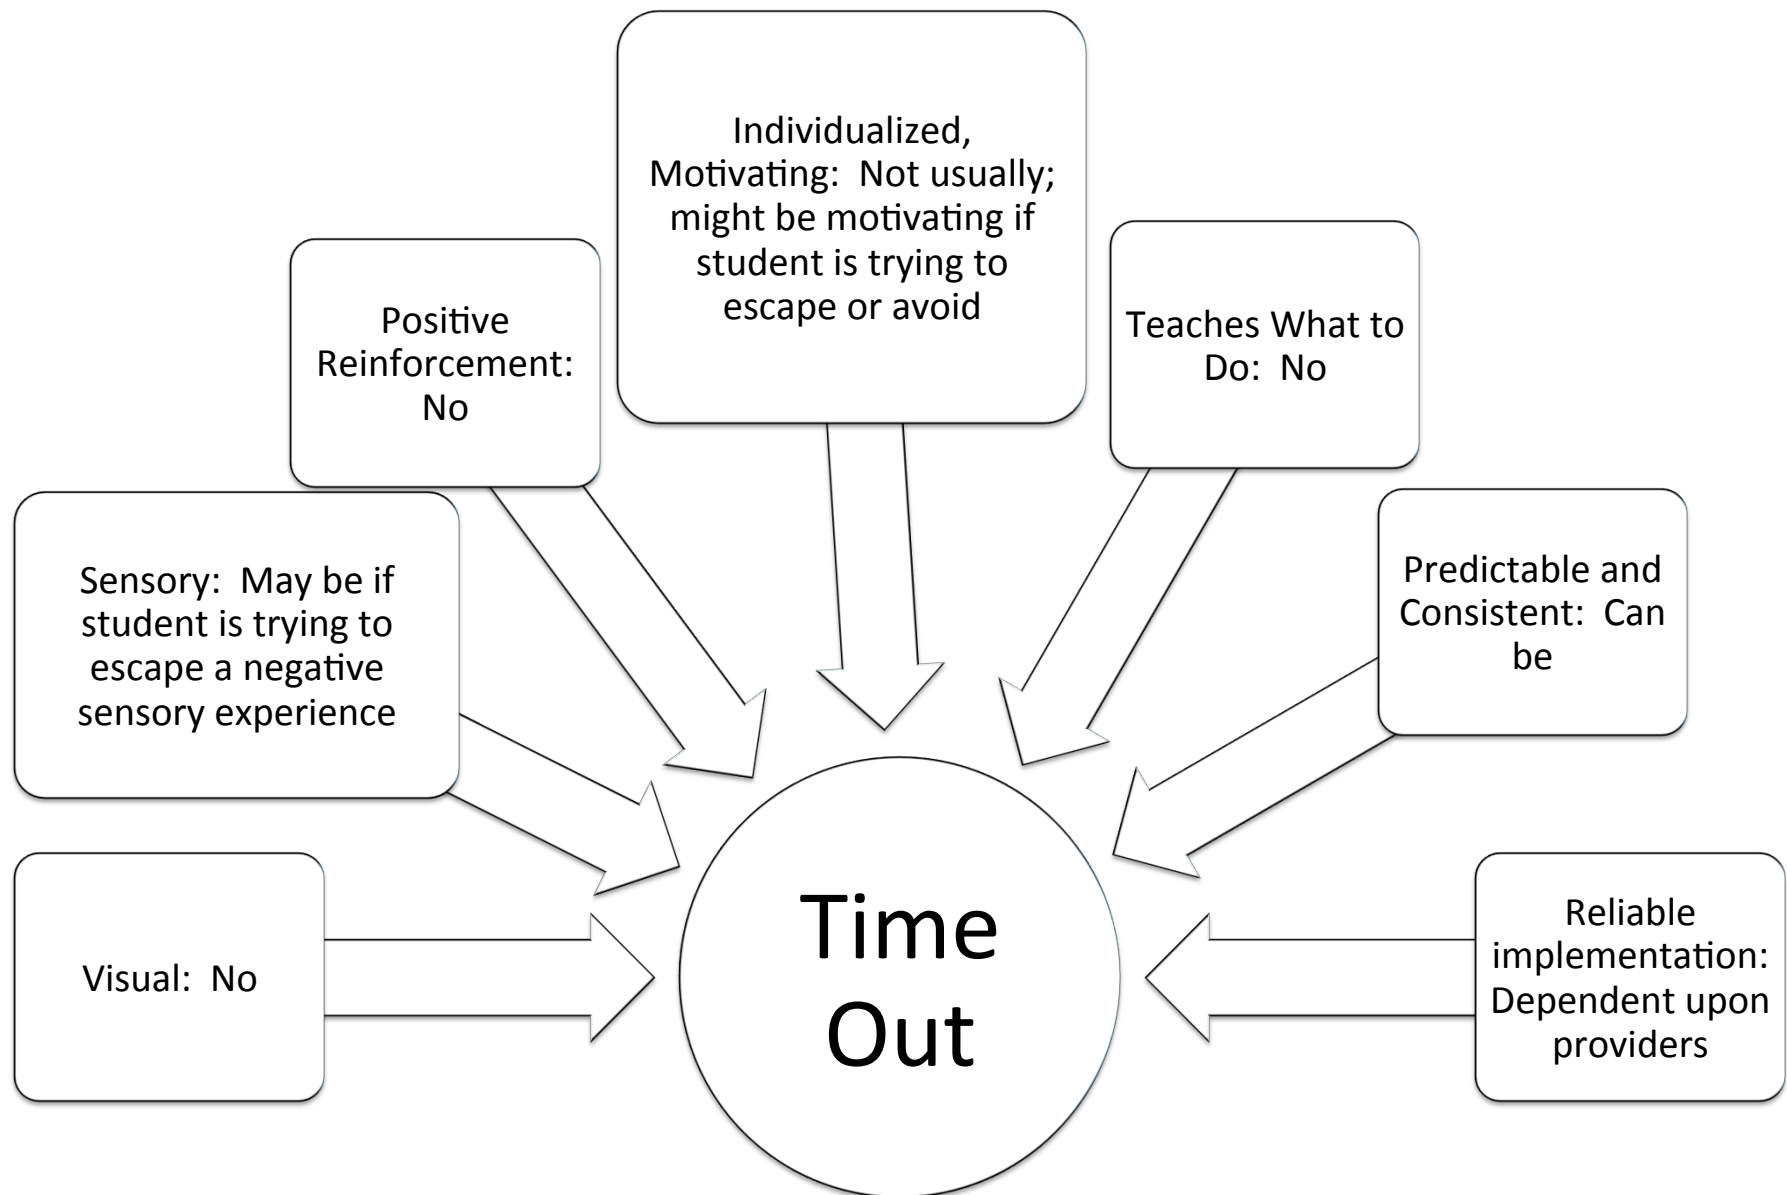

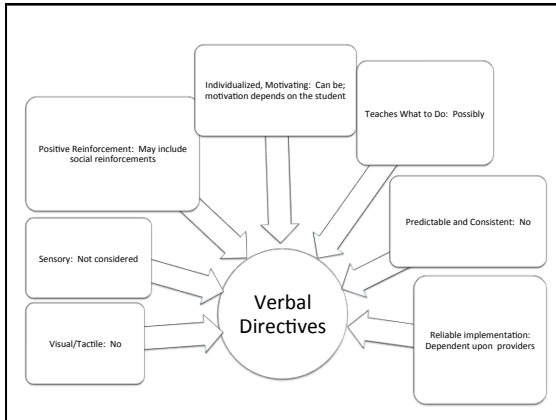

Verbal Directives

- Using spoken words to correct/direct behavior
- Using spoken words to prompt completion of an action or task

SART Worksheet

- Fill in student name
- Choose a strategy the team/you are using or a strategy the team/you want to try with the individual
- Determine if the strategy includes each element for the individual using the guiding questions sheet
- If yes, describe how in column three or if no, describe what you might be able to do to include or improve the element in column four

| Strategy Assessment and Reflection Worksheet | | | |
|----------------------------------------------|---------------------------------------------------|-------------------------------------------|----|
| Name of Strategy | Does the strategy include the following elements? | If not, how can the strategy be improved? | |
| | | Yes | No |
| Individualized | Yes | | |
| Motivating | Yes | | |
| Teaches What to Do | Yes | | |
| Predictable and Consistent | Yes | | |
| Reliable Implementation | Yes | | |
| Visual/Tactile | Yes | | |
| Sensory | Yes | | |
| Positive Reinforcement | Yes | | |
| Individualized | Yes | | |

| Teaches What to Do | Yes | | |
| Predictable and Consistent | Yes | | |
| Reliable Implementation | Yes | | |
| Visual/Tactile | Yes | | |
| Sensory | Yes | | |
| Positive Reinforcement | Yes | | |

SART Guiding Questions

Use the Guiding Questions sheet to help determine how each element of the SART is included in your chosen strategy.

| Guiding Questions | | | |
|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----|----|
| Use the questions below to guide discussion and record when administering the strategy in your program. | | | |
| Individualized | Is the strategy individualized to the student's needs? | Yes | No |
| Motivating | Is the strategy motivating to the student? | Yes | No |
| Teaches What to Do | Does the strategy teach the student what to do? | Yes | No |
| Predictable and Consistent | Is the strategy predictable and consistent? | Yes | No |
| Reliable Implementation | Is the strategy implemented reliably? | Yes | No |
| Visual/Tactile | Is the strategy visual or tactile? | Yes | No |
| Sensory | Is the strategy sensory? | Yes | No |
| Positive Reinforcement | Is the strategy reinforced with positive reinforcement? | Yes | No |
| Individualized | Is the strategy individualized to the student's needs? | Yes | No |
| Motivating | Is the strategy motivating to the student? | Yes | No |
| Teaches What to Do | Does the strategy teach the student what to do? | Yes | No |
| Predictable and Consistent | Is the strategy predictable and consistent? | Yes | No |
| Reliable Implementation | Is the strategy implemented reliably? | Yes | No |
| Visual/Tactile | Is the strategy visual or tactile? | Yes | No |
| Sensory | Is the strategy sensory? | Yes | No |
| Positive Reinforcement | Is the strategy reinforced with positive reinforcement? | Yes | No |

SART Worksheet

- Fill in student name
- Choose a strategy the team/you are using or a strategy the team/you want to try with the individual
- Determine if the strategy includes each element for the individual using the guiding questions sheet
- If yes, describe how in column three or if no, describe what you might be able to do to include or improve the element in column four

Strategy Assessment and Revision Tool Worksheet

Use this worksheet to assess a strategy for potential effectiveness and to identify the missing elements that will strengthen the impact of the intervention. Identify how well each of the seven effective elements are represented in the targeted strategy. Revise and improve current strategies by identifying ways to include the missing elements.

| Name of Individual: | | | |
|-----------------------------|--------------------------------------------------------------------------------------------------|------------------------------------------|---------------------------------------------------------------------------------|
| Element | Does the current strategy include the element? | Strategy: | |
| | | Description of Existing Element Features | Revisions of Strategy to Include Missing Element or to Improve Targeted Element |
| Visual/Tactile | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Sensory Consideration | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Positive Reinforcement | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Individualized & Motivating | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Teaches What To Do | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Predictable & Consistent | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |
| Reliable Implementation | <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | | |

SART Guiding Questions

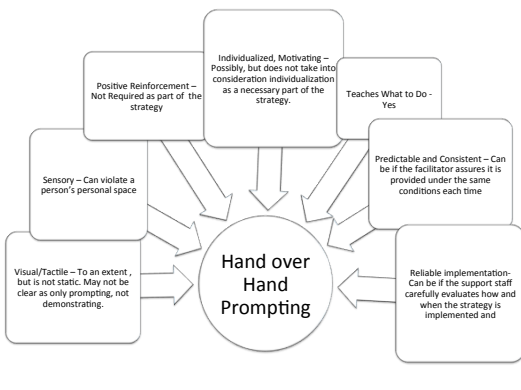

Use the Guiding Questions sheet to help determine how each element of the SART is included in your chosen strategy.

| Elements | Guiding Questions |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Use the questions below to guide discussion and thought when determining if each element is present in the targeted intervention for the specific person the intervention is designed to assist |
| Visual/Tactile | <ul style="list-style-type: none"> What aspects on the intervention are represented visually? What is the visual element? Words? Pictures? Symbols? Objects? Video? Is the visual representation available consistently? Is the visual component provided understandable to this person? |
| Sensory Consideration | <ul style="list-style-type: none"> Are sensory sensitivity and sensory preferences included as part of the intervention? How? Is the sensory nature of the intervention generic, assuming it will meet the needs of anyone? Is consideration given to how the intervention will affect all senses? Auditory, visual, tactile/touch, movement, smell or other sensory senses? Is the sensory component only available under certain considerations or if earned? |
| Positive Reinforcement | <ul style="list-style-type: none"> Does the intervention include reinforcement? Is it clear to the individual what must be done to receive reinforcement? Is it consistent? Is the reinforcement desirable to this person or is it "generic"? Has the person shown an interest in the reinforcement or is it assumed? Is it always the same reinforcement? Does it change dependent on the difficulty or effort required to earn the reinforcement? Is there opportunity for choice? |
| Individualized & Motivating | <ul style="list-style-type: none"> Does the activity or task have this person's interests and preferences built in as part of the task? Is the plan individualized for this person or the same for everyone? Does the plan contain the type of visual, sensory and reinforcement elements that match the person's specific needs and strengths? How is this plan unique for this person? |
| Teaches What To Do | <ul style="list-style-type: none"> Does the intervention have an element focused on teaching? Does the plan teach what "to do" rather than what "not to do"? Is "what to do" clear and concrete? Are aspects of the "Hidden Curriculum" taught to assist this person to remember what to do & why? Are there enough supports and reinforcement for this person to be able to meet the identified expectations? |
| Predictable & Consistent | <ul style="list-style-type: none"> Is the intervention predictable for this person or is it vague? Is the structure of the intervention such that it looks, sounds or presents similarly/predictably from time to time and place to place? Does this person recognize the elements of the intervention such that he begins to predict it? |
| Reliable Implementation | <ul style="list-style-type: none"> Do all those supporting and using this intervention use it the same way? Are the elements of the intervention implemented in the same manner at the same time in all locations? Do all those implementing the intervention understand the elements and the intention of the intervention? Is data being collected to be able to evaluate the effectiveness of the intervention for this person? Is it collected consistently by all those responsible for the implementation of the intervention? |

Hand Over Hand

- Physical prompt
- Adult guides hand of individual to complete an action or task

Strategy Assessment/Revision Sheet: Hand Over Hand Prompting for Molly

Strategy Assessment and Revision Worksheet
Use this worksheet to assess a strategy for potential effectiveness and to identify the missing elements that will strengthen the impact of the implementation. Identify how well each of the seven effective elements are represented in the targeted strategy. Review and improve current strategies by identifying ways to include the missing elements.

| Name of Individual: Molly | | Strategy: Hand Over Hand Prompting | |
|----------------------------------|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Element | Does the current strategy include this element? | Description of Existing Element Features | Revisions of Strategy to Include Missing Element or to Improve Targeted Element |
| Visual/Tactile | Yes No Somewhat | Kind of, but not static. It's prompting, not demonstration. | Develop visual prompts to show how to do the task/action; model the task/action |
| Sensory/Discomfort | Yes No Somewhat | She is tactile defensive, so hand over hand might cause her some discomfort | Hand under hand would give Molly the pressure control and an ability to release her hand easier |
| Positive Reinforcement | Yes No Somewhat | Not part of this strategy | Build in reinforcement for completing the task/action using items from her reinforcement survey/assessment |
| Individualized & Motivating | Yes No Somewhat | She is prompted when she seems to require it, but doesn't like the touch or having other people move her hand | Add special interest of music or movement to the task/action |
| Teaches What to Do | Yes No Somewhat | It moves Molly through the action or task so she can see how to do it | |
| Predictable & Consistent | Yes No Somewhat | Staff tries to do the prompt the same each time | |
| Reliable Implementation | Yes No Somewhat | Staff are waiting for a count of 10 for Molly to provide directions before hand over hand | |

Strategy Assessment/Revision Sheet: Hand Over Hand Prompting for Molly

Strategy Assessment and Revision Worksheet

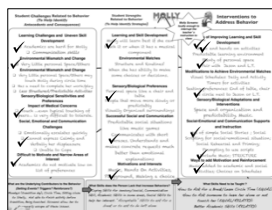

Use this worksheet to assess a strategy for potential effectiveness and to identify the missing elements that will strengthen the impact of the intervention. Identify how well each of the seven effective elements are represented in the targeted strategy. Revise and improve current strategies by identifying ways to include the missing elements.

| Name of Individual: Molly | | | |

| Reliable Implementation | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Somewhat | Staff are waiting for a count of 12 for Molly to process directions before hand over hand | |

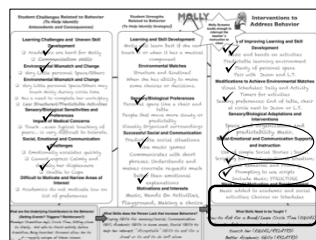

Check the Plan

- Have you included strategies to address the **antecedents** that are setting up and triggering the behavior?
- Have you included strategies to address the **consequences** that are maintaining or reinforcing the behavior?
- Cross check each item in the “Challenges” and the “Strengths” with the Intervention Items to **assure each has been addressed.**

What are you teaching?

Circle the strategies in the third column that reinforce and teach replacement and new skills.

Challenges Related to Behavior (To Help Identify Antecedents and Consequences)

Strengths Related to Behavior (To Help Identify Strategies)

Interventions to Address Behavior

MOLLY

Molly Screams
loudly enough to
interrupt the
teacher's
instruction to
class

Intervention plan should
include ways to "teach"
and "reinforce" the
replacement or
substitute skills
AND
strategies to address
other challenges (such as
setting events)

Learning Challenges and Uneven Skill Development

- Academics are hard for Molly
- Communication skills
- Environmental Mismatch and
- Very Little personal Space
- Environmental Mismatch and
- Very Little personal Space
- touch Molly during class
- Has a need to complete work
- Less Structured/Predictable
- Sensory/Biological Sensitivities
- Preferences
- Impact of Medical Condition
- Touch ...even typical peers... is very difficult
- Social, Emotional and Communication
- Challenges
- Emotionally escalated
- Cannot express Calmly
- her displeasure
- Unable to Coping
- Difficult to Motivate and Narrow
- Interest
- Academics do not motivate low on
- List of preferences

Learning and Skill Development Molly will learn best if she can

Ways of Improving Learning and Skill Development

- Music and hands on activities
- Predictable learning environment
- Plenty of personal space
- Pair with Jason and L.T.
- Modifications to Achieve Environmental Matches
- Visual Schedules: Daily and Activity
- Timers for activities;
- Seating preferences: End of table, chair
- at circle next to Jason or L.T.
- Sensory/Biological Adaptations and
- Interventions
- Space and organization and
- predictability; Music
- Social, Emotional and Communication Supports
- and Instruction
- Use of simple Social Stories; Social
- Scripting for social-emotional situation;
- Social Rehearsal and Priming;
- Prompting to use scripts;
- Include Music; STRUCTURE
- Ways to add Motivation and Reinforcement
- Music added to academic and social
- activities; Choices on schedules

What are the Underlying Contributors to the Behavior (Setting Events? Triggers? Reinforcers?)

Mondays (transition day), Circle Time, Sitting close to Shelly, Not able to finish activity before transition, Being touched. Screams allow her to temporarily escape all these issues.

What additional skills are needed to improve behavior?

Coping Skills for sensory/social/environmental challenges; Different Communication Skills for expressing emotions and to allow her to "break" or "escape"; Academic Skills in some areas;; Social Skills to help her expand her successful interactions

What Skills Need to be Taught ?

How to Ask for a Break/Leave Circle Time (EQUAL)
How to Ask someone to leave her alone or not touch her (EQUAL/RELATED)
Better Academic Skills (RELATED)

Aligning Strategy Selection to Identified Antecedent, Consequences and Strengths

Check the Plan

- Have you included strategies to address the **antecedents** that are setting up and triggering the behavior?
- Have you included strategies to address the **consequences** that are maintaining or reinforcing the behavior?
- Cross check each item in the “Challenges” and the “Strengths” with the Intervention Items to **assure each has been addressed.**

What are you teaching?

Circle the strategies in the third column that reinforce and teach replacement and new skills.

| Student Challenges Related to Behavior (To Help Identify Antecedents and Consequences) | Student Strengths Related to Behavior (To Help Identify Strategies) | Interventions to Address Behavior |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Learning Challenges and Uneven Skill Development <ul style="list-style-type: none"> Academics are hard for Molly Communication skills Environmental Mismatch and Change <ul style="list-style-type: none"> Very Little personal Space/Others touch Molly during circle time Very Little personal Space/Others may touch Molly during circle time Has a need to complete her work/play Less Structured/Predictable Activities Sensory/Biological Sensitivities and Preferences <ul style="list-style-type: none"> Impact of Medical Concerns Touch ...even typical touching of peers... is very difficult to tolerate. Social, Emotional and Communication Challenges <ul style="list-style-type: none"> Emotionally escalates quickly Cannot express Calmly and Verbalize her displeasure Unable to Cope Difficult to Motivate and Narrow Areas of Interest <ul style="list-style-type: none"> Academics do not motivate low on List of preferences | Learning and Skill Development <ul style="list-style-type: none"> Molly will learn best if she can touch it or when it has a musical component Environmental Matches <ul style="list-style-type: none"> Structure and Routines! When she has ability to make some choices or decisions. Sensory/Biological Preferences <ul style="list-style-type: none"> Personal space like a chair and table People that move more slowly or predictably Visually Organized surroundings Successful Social and Communication <ul style="list-style-type: none"> Predictable social situations like music games Communicates with short phrases. Understands and makes concrete requests much better than emotional explanations Motivations and Interests <ul style="list-style-type: none"> Music, Hands On Activities, Playground, Making a choice | of Improving Learning and Skill Development <ul style="list-style-type: none"> Music and hands on activities Predictable learning environment Plenty of personal space Pair with Jason and L.T. Modifications to Achieve Environmental Matches <ul style="list-style-type: none"> Visual Schedules: Daily and Activity Timers for activities Seating preferences: End of table, chair at circle next to Jason or L.T. Sensory/Biological Adaptations and Interventions <ul style="list-style-type: none"> Space and Organization and predictability. Music. Social-Emotional and Communication Supports and Instruction <ul style="list-style-type: none"> Use of simple Social Stories ; Social Scripting for social-emotional situation; Social Rehearsal and Modeling Prompting to use scripts Include Music; STRUCTURE Ways to add Motivation and Reinforcement |
| What are the Underlying Contributors to the Behavior (Setting Events? Triggers? Reinforcers?) Mondays (transition day), Circle Time, Sitting close to Shelly, Not able to finish activity before transition, Being touched. Screams allow her to temporarily escape all these issues. | What Skills does the Person Lack that Increase Behaviors? Coping Skills for sensory/social, Communication Skill, Academic Skills in some areas, Social Skills to help her interact. "Acceptable" Skills to ask for a break or to ask to be left alone | What Skills Need to be Taught ? How to Ask for a Break/Leave Circle Time (EQUAL) touch her (EQUAL/RELATED) Better Academic Skills (RELATED) |

Behavior Plan Steps Chart

| ✓ When Complete | Creating an Individualized Behavior Support Plan <i>Complete Each Step</i> | |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | Select the target individual. Select the behavior of concern that the team would like to help the individual change Questions to consider: What behavior is having an impact on the individual's ability to access learning, LRE, social opportunities, or safety? What behavior would the team be willing to focus on to learn a new process? | |
| | Define the behavior in measureable terms | |
| | Identify underlying challenges that may be associated with the behavior | |
| | Summarize underlying challenges in section 1 of intervention form | |

Action Steps

Action Steps for Behavior Support Plan

Some strategies in a support plan will require multiple steps in order to be prepared, created and implemented.
This form allow the team to identify discrete steps and required action for strategies that are complex to prepare and implement.

| Strategy | Prepare | | Implement | | Responsible Person(s) to Assure Completion | Data Collection who, when how |
|----------|--------------------------------|-------------------------------------------|----------------------------------|----------------------------|--------------------------------------------|-------------------------------|
| | Steps to Prepare What and When | Materials/items/ action needed to prepare | Steps to Implement What and When | Action needed to Implement | | |
| | | | | | | |
| | | | | | | |

Student Name:

Behavior of Concern

Review & Check

| Name: | | Behavior: | |
|------------------------------------------|---------------------------------------|------------------------------------|------------------------------------------------------------------|
| Replacement Skills: | | | |

| Social/ Emotional/ Communication | | | |
| Motivation and Narrow Interest | | | |

Last Step Before Implementation

- Identify your district or agency approved behavior plan form OR, if applicable, your preferred behavior plan form
- Transfer the information from the forms in this behavior process to your district or agency forms

Using the Process: Next Steps

- Complete the plan with as much information as possible
- Select strategies that you are going to try first
- Assess and revise the first strategies
- Implement your plan and keep data
- Continue to update
