Antecedents

Behavior

Consequences

Setting Events

Triggers

Factors that Increase the Behavior (Reinforcement)

What is Increasing or Decreasing the Targeted Behavior?

Behavior

Learning Challenges and Uneven Skill Development

Environmental Mismatch and Change

Sensory/Biological Sensitivities and Preferences
Impact of Medical Concerns

Social, Emotional and Communication Challenges

Difficult to Motivate
Narrow Areas of Interest

Begin with Success: Recognize the Strengths

Physical Attributes

Coping Skills

Communication

Functional Skills

Self Monitoring and Self Regulation of Sensory Needs

Academically related areas

Work Habits

Personality

Motivators and Reinforcers

Social Competencies
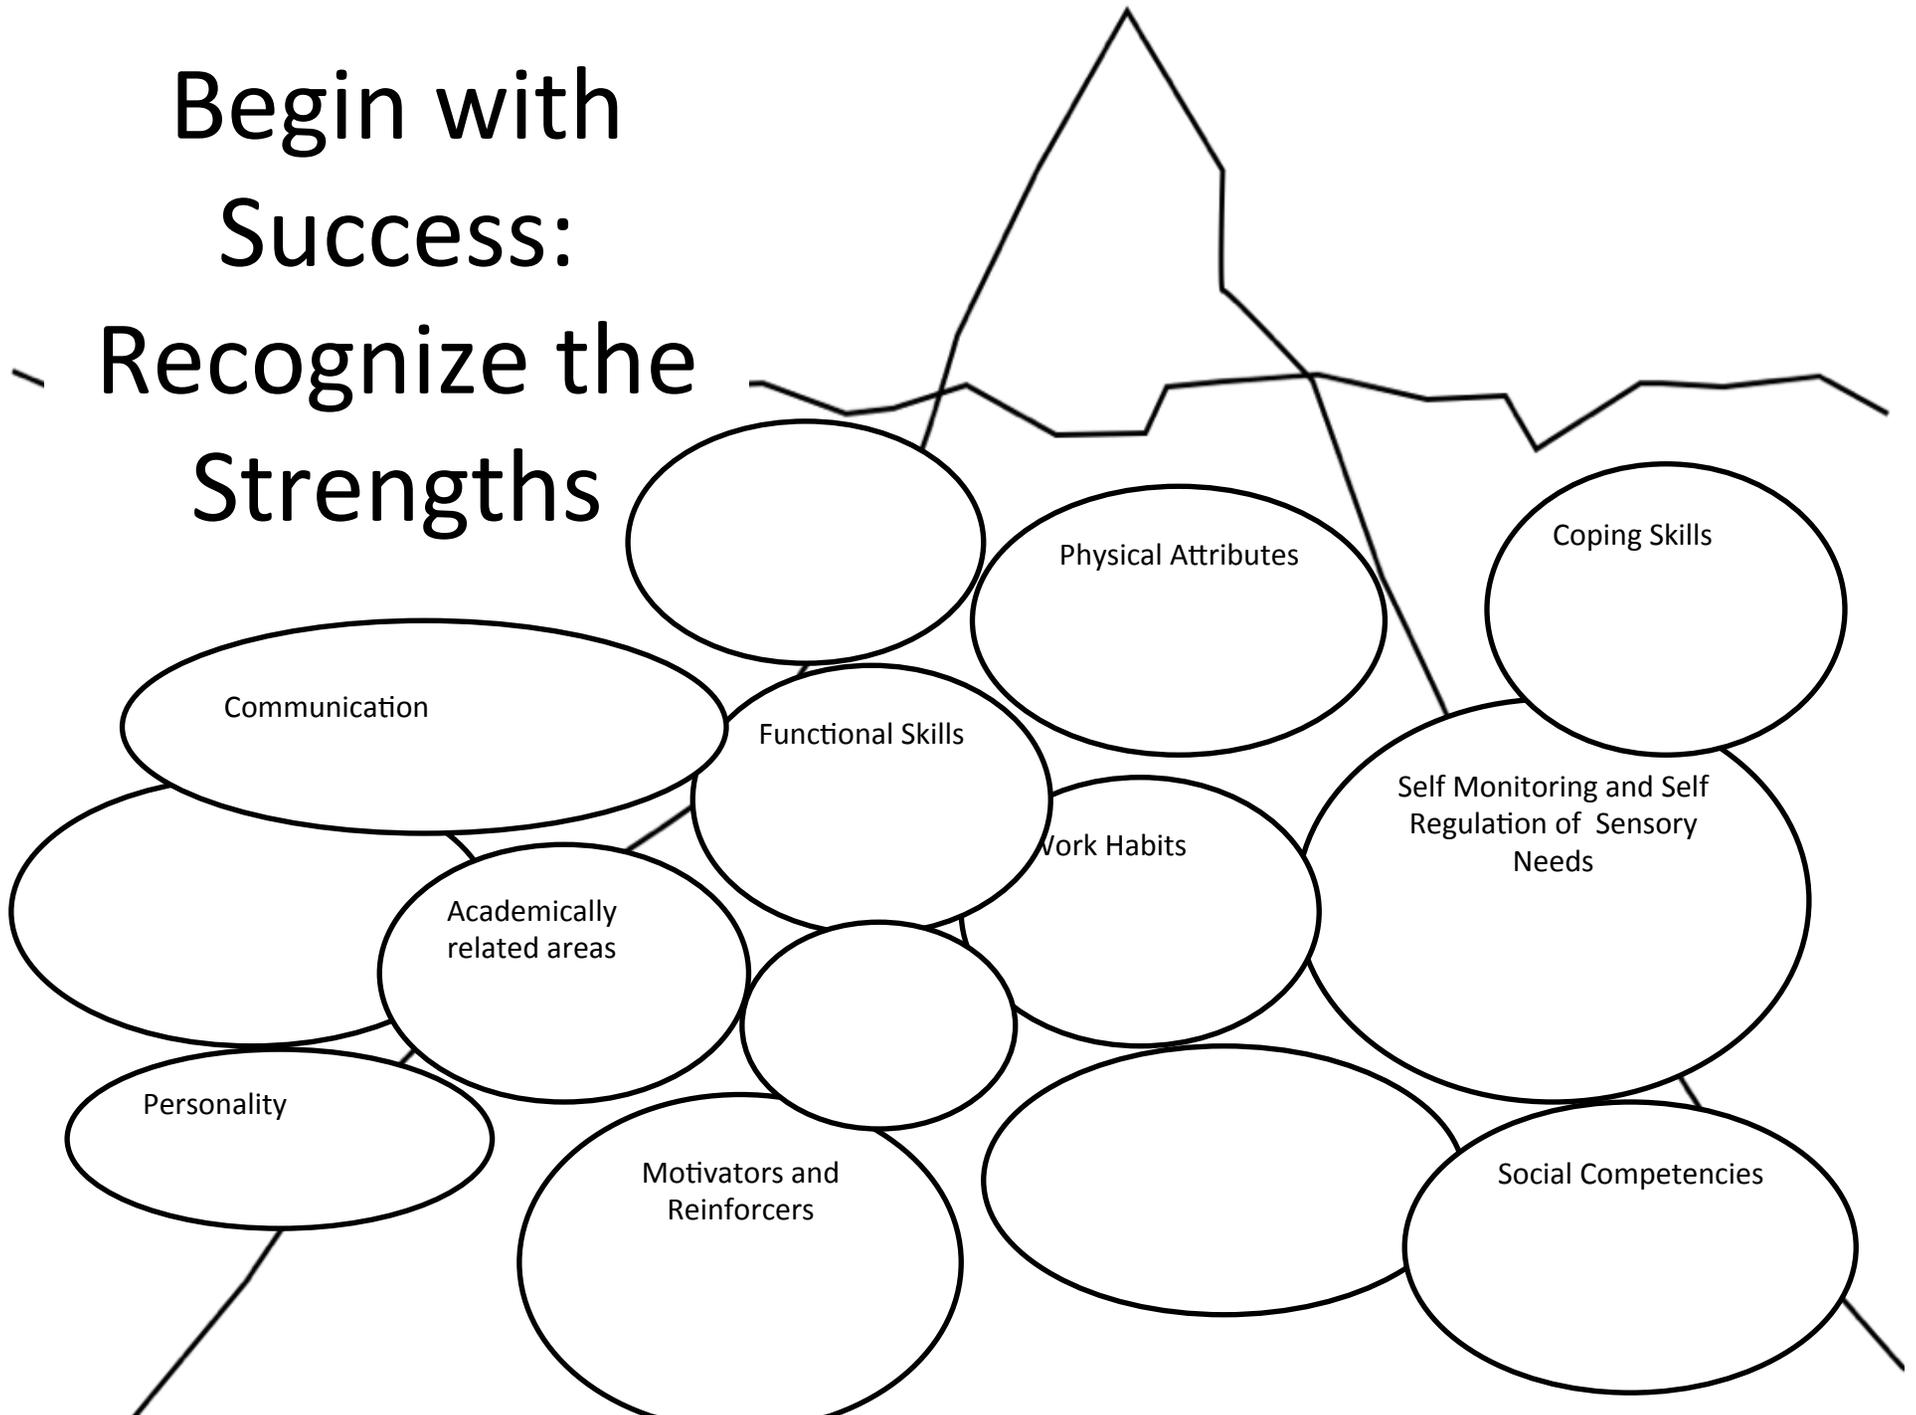

Challenges Related to Behavior
(To Help Identify Antecedents and Consequences)

Ways of Improving Learning and Skill Development

Modifications to Achieve Environmental Matches

**Sensory/Biological Adaptations and Interventions**

Social-Emotional and Communication Supports and Instruction

Ways to add Motivation and Reinforcement

2

What are the Underlying Contributors to the Behavi*or*
(Setting Events? Triggers? Reinforcers?)

4

What additional skills are needed to improve behavior?

5

What Skills Need to be Taught ?

Data and Your Individual

Behavior
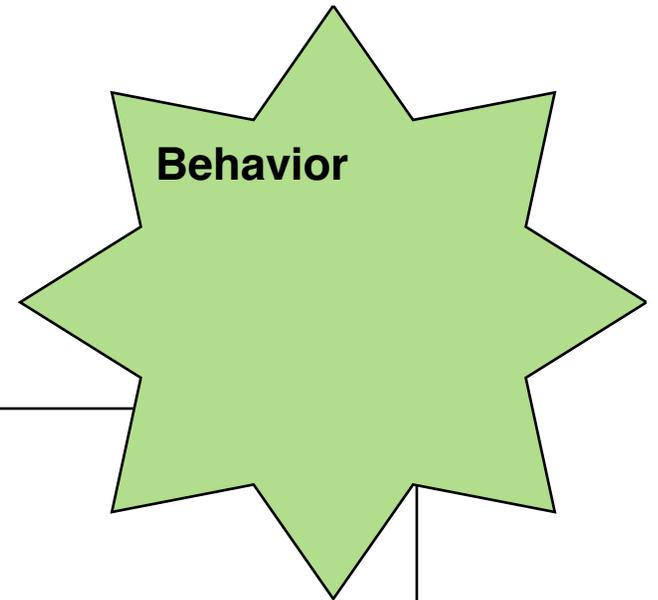

What are you going to measure?	
What would be the best way to measure?	
Who is going to create the data sheet?	
Who will be responsible to track the data? Graph the data?	
When will the team meet to review data?	

Reinforcement and Your Individual

Discuss what is reinforcing to your individual. If you aren't sure, how can you find out?	
What types of reinforcement would work best with your individual?	
What schedule of reinforcement would best support teaching the new skills that will change the behavior?
