

The Eclipse Adventure

"Sometimes, something amazing happens in the sky. It's called an eclipse!"

"There are different kinds of eclipses. One kind is called a solar eclipse. During a solar eclipse, the moon covers the sun, making it dark for a little while."

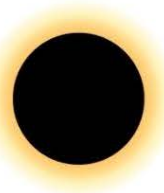

"When we want to watch a solar eclipse, we wear special glasses to protect our eyes. These glasses keep our eyes safe while we look at the sun."

"Sometimes, the sounds during an eclipse can feel different. It's okay to wear headphones or sunglasses if it helps you feel more comfortable."

"Look up at the sky during the eclipse! It's exciting to see the moon covering the sun. Remember to stay safe and not to look directly at the sun without your special glasses."

"After the eclipse, the sun comes back out, and everything goes back to normal. It was a special moment we got to share!"
