## Valuable Strategies for Life

### Toddler and Preschool Age

Early childhood is an important time to help young children with ASD to develop critical language and learning skills. With video examples in homes and preschool classrooms, this course will introduce you to evidence-based strategies that can be used in natural environments during typical routines and activities of toddlers and preschoolers. Prerequisite: Many Faces of Autism

[Preview Course](#)

### School Age

During the elementary and middle school years, school-aged individuals with ASD are developing skills in many areas that will impact their futures. This course presents evidence-based strategies in action in home, school and community environments. Prerequisite: Many Faces of Autism

[Preview Course](#)

### Transition Age

Adolescents and young adults with ASD need many critical skills as they prepare for transitioning from high school into their own, unique adult lives. This course will show you how to use evidence-based strategies to support individuals who are transition-aged and young adults through video examples at home, school, work, and in the community. Prerequisite: Many Faces of Autism
