

Flexible Co-Planning: Integrating Specially Designed Instruction (SDI) to Ensure Access to the General Curriculum

October 8, 2020 | 4:00 p.m

Presented by:

Shawna Benson, Program Director, Teaching Diverse Learners Center at OCALI

Sara Miller, Educator, North Central Ohio.

The InspirED Virtual Learning Series provides professionals and parents the opportunity to improve their ability to support students in a remote learning environment. Each session provides experiences, tools and/or resources that can effectively assist in the facilitation of educating students online. This session will focus on flexible collaborative planning. During this unpredictable time, educators are challenged to maintain high leverage practices, one such practice would include collaborative planning. Collaborative planning is essential to ensuring that all students receive instruction that meets their unique needs, while flexing between face-to-face, hybrid and virtual learning environments.

Surprisingly, even more pre-planning and collaboration is required among teachers, specialists, families and administrators when learning shifts to a virtual environment. This session will provide a sneak peek into one such co-planning session. Specific attention will be paid to the integration of Specially Designed Instruction (SDI) and other supports for learners who have IEP specific supports.

Supporting Resources:

Class Profile (SDI & SAS) Example
