

Information. Connection. Empowerment.

In partnership with the Ohio Department of Education and Workforce, the Outreach Center for Deafness and Blindness presents a free new video module, *Promoting Access for People Who are Deaf, Hard of Hearing, Blind, or Visually Impaired*.

Information is everywhere you look and everywhere you listen. When vision or hearing is affected, part of that information is missing, and this can create hurdles. With the right tools and strategies in place, you can increase access to that information and open up opportunities for meaningful participation.

This 60 – 90 minute training will get you started with tools and strategies, and empower you in your connections with people who are deaf, hard of hearing, blind, or visually impaired.

Hear perspectives from people who are deaf, hard of hearing, blind, or visually impaired, their families, community members, educators, and others who touch their lives.

Gain insights from their experiences and learn effective strategies that can have an impact on another person's quality of life.
