

How to Say Hi Without Touching

When I see my friends and family, I get excited. Sometimes I like to touch their face or their body when I say hi to them.

Right now, I need to be at least six feet away from them.

Instead of touching my family or friends, I can say hi to them in other ways:

- I can wave at them

- I can smile at them

- I can salute them

It is OK to say hi in other ways.

It's important for me to say hi to my friends and family.

It makes everyone happy when I say hi to them.
