Why Do Some People Not Have To Wear A Mask?

Most people wear masks when they leave their home and go out in public. I wear my mask at school and in public. My teacher wears his/her mask at school and in public.

My friends wear their masks at school and in public. My family wears their masks at work and in public.
I may see some people without a mask on.

Some people may not be wearing a mask for different reasons:

- It could be because of medical reasons
- It could be they are far enough apart from others and don't need a mask
It could be because they are struggling keeping the mask on and might become upset.

It is OK if I see other people not wearing a mask. When I wear my mask, it makes my teachers, friends and family feel safe and healthy.
